

Summary of Conference Survey Responses

Spring Leadership Conference 2019

April 24th - Holiday Inn by the Bay

General Comments:

- Great job and a great deal for the money!
- This was a very helpful day. I found all 4 sessions I attended to be useful, and the keynote was informative as well as entertaining.
- Would have liked to see more sessions on Student Data Privacy
- Best ACTEM event I have attended in 10 years.
- Excellent conference
- Thank you so much for your help.
- Keynote rocked my world in every way. I wish it had been longer.
- Technology leadership needs to have an increased awareness of information security, and strategies for providing it under a limited budget. This could be a good theme for next year.
- All around excellent job! Thank you!SL
- Thanks for continuing to put on events like this.

ACTEM plans to offer a Leadership Conference each spring with a different theme. What suggestions would you have for next year's theme?

- I think Security has to stay front and center - Digital Security (phishing, identity theft, ransomware, malware etc)
- Data Security
- SIS or LMS
- I think continuing with Security would be awesome. It seemed like this conference opened a lot of people's eyes.
- MDM's, classroom displays, networking equipment?
- Professional IT team management
- Laptops/Tablets (Chromebook, Apple, Windows, ...) and management solutions (MDMs)
- 2020 - The Future of Education Technology, MLTI, & Wireless
- Ferpa, Cipa, Coppa, legality of signing students up for online services. Parental permission etc
- Anybody ever ask about procurement and bidding?
- The GSuite presentation - Many schools have shifted to GSuite (and Google devices) to provide their organization's software (and hardware) services so Google Administration is a key service and could use more time to provide leaders guidance on the administration of the tool.
- I would like to see a conference where we see the next big thing. What comes after coding, robotics, and 3-D printing. I feel like eSports was the next big thing type presentation. What else is just around the corner for schools?
- Professional development using technology
- Free and Open Source software and hardware for education
- Goal and Roles of Technology in Education for the 21st century.
- Best practices in providing professional development
- The Security theme that ACTEM did last year and this year have been hugely beneficial. Would love the same theme just with different sessions.
- Student Choice and Voice, Design Thinking in Education,
